

OLUS-BIS Immigration Services

Project Overview

Generated: June 30, 2026

1. Project Summary

A full-stack immigration case management platform built with Next.js 16, React 19, and TypeScript. It provides end-to-end management of immigration cases, clients, leads, consultations, documents, and communications — with AI-powered assessment capabilities.

2. Tech Stack

Category	Technologies
Framework	Next.js 16.2.9 (App Router), React 19.2.4, TypeScript
Styling	Tailwind CSS v4, CVA, Framer Motion, tw-animate-css
Database	Supabase PostgreSQL (via Prisma ORM)
Authentication	NextAuth v5 (beta), Prisma Adapter, bcryptjs
UI Components	Radix UI, Base UI (v1.5), shadcn, cmdk, lucide-react
Forms	React Hook Form, Zod v4
File Storage	Supabase Storage
AI	OpenAI SDK (v6)
Email	Nodemailer (SMTP) / Resend
Theming	next-themes
SEO	next-sitemap
Deployment	Vercel

3. Database Schema

The Prisma schema (PostgreSQL) defines the following models on Supabase:

Model	Purpose
User	Role-based (SUPER_ADMIN, ATTORNEY, CASE_MANAGER, SUPPORT_STAFF, CLIENT)
Client	Extended client profiles with immigration details

Lead	Inbound leads with source tracking (website, referral, etc.)
Consultation	Appointment scheduling linked to leads/clients
Case	Immigration case lifecycle (DRAFT to CLOSED) with visa categories
Milestone	Case progress tracking with due dates
Document	Client file uploads with verification workflow
Testimonial	Client success stories with ratings
BlogPost / BlogCategory	Blog CMS for immigration articles
FAQ	Frequently asked questions
VisaCategory	Visa type definitions
ContactRequest	Contact form submissions
Assessment	Immigration eligibility assessments
Notification	System notifications for users
Message	Internal messaging (staff/client)
ActivityLog	Audit trail
Setting	Key-value application settings
Account / Session	NextAuth authentication records
VerificationToken	Email verification tokens

4. Application Structure

Source Directory (src/)

Path	Description
app/(dashboard)/	Admin & client portal (role-protected routes)
app/(public)/	Public pages: about, assessment, auth, blog, contact, FAQ, services, success-stories, home
app/api/	API routes: AI, assessment, auth, consultations, contact, documents, messages, uploads
components/dashboard/	Dashboard-specific UI components
components/forms/	Form components
components/layout/	Layout wrappers and navigation
components/shared/	Reusable shared components
components/ui/	Base UI primitives (shadcn-style)
hooks/	Custom React hooks
lib/	Utilities: auth, Prisma client, Supabase clients, email, constants, validations
types/	TypeScript type definitions

5. Key Features

1. Immigration Case Management — Full case lifecycle from lead intake to case closure
2. Role-Based Access Control — 5 distinct roles with granular permissions
3. AI-Powered Eligibility Assessment — OpenAI-driven immigration pathway recommendations
4. Document Management — Secure upload to Supabase Storage with verification workflow
5. Consultation Scheduling — Calendar management with video meeting links
6. Lead Management — Multi-source lead capture, scoring, and conversion
7. Blog CMS — Full blog with categories, authors, and SEO metadata
8. Internal Messaging — Staff-client communication with threading
9. Notification System — Real-time notifications for key events
10. Contact & Inquiry Forms — Public contact forms with automated responses
11. WhatsApp Integration — Public-facing WhatsApp contact button
12. SEO Optimized — Dynamic sitemap, meta tags, and structured data

6. Architecture

Hosting (Vercel)

The Next.js app is deployed on Vercel, which provides edge network distribution, automatic SSL, and continuous deployment from GitHub.

Database (Supabase PostgreSQL)

All application data is stored in a Supabase PostgreSQL database. Prisma ORM handles schema management, migrations, and query building.

File Storage (Supabase Storage)

Client documents (PDFs, images, Word files) are uploaded directly from the browser to Supabase Storage using the Supabase JS client. File metadata is persisted in the database for tracking and verification.

Authentication (NextAuth)

User authentication is handled by NextAuth v5 with credentials provider. Session data is stored in the database via the Prisma adapter.

7. Environment

Variables

Variable	Purpose
DATABASE_URL	Supabase PostgreSQL connection (pooler)
AUTH_SECRET / AUTH_URL	NextAuth configuration
OPENAI_API_KEY	AI assessment feature
SMTP_*	Email sending (Nodemailer)
RESEND_API_KEY	Alternative email provider
NEXT_PUBLIC_SITE_*	Public site configuration
NEXT_PUBLIC_SUPABASE_URL	Supabase project URL
NEXT_PUBLIC_SUPABASE_ANON_KEY	Supabase anonymous key (browser)
SUPABASE_SERVICE_ROLE_KEY	Supabase admin key (server)
NEXT_PUBLIC_SUPABASE_STORAGE_BUCKET	Storage bucket name (documents)

8. Scripts

Command	Action
npm run dev	Start development server
npm run build	Build for production
npm run start	Start production server
npm run lint	ESLint
npm run prisma:generate	Generate Prisma client
npm run prisma:push	Push schema to database
npm run prisma:migrate	Run database migrations
npm run prisma:seed	Seed the database
npm run prisma:studio	Open Prisma Studio GUI
